

WHAT ARE PROMISES?

PROMISE

👉 **Promise:** An object that is used as a placeholder for the future result of an asynchronous operation.

↓ Less formal

👉 **Promise:** A container for an asynchronously delivered value.

↓ Less formal

👉 **Promise:** A container for a future value.

Example: Response
from AJAX call

👉 We no longer need to rely on events and callbacks passed into asynchronous functions to handle asynchronous results;

👉 Instead of nesting callbacks, we can **chain promises** for a sequence of asynchronous operations: **escaping callback hell** 🎉

Promise that I will receive money if I guess correct outcome

I buy lottery ticket (promise) right now

Lottery draw happens asynchronously

If correct outcome, I receive money, because it was promised

THE PROMISE LIFECYCLE

👉 We are able **handle** these different states in our code!
